

FINAL YEAR PROJECT (FYP) PRESENTATIONS FOR THE 2019 BATCH OF THE BACHELOR OF SCIENCE IN COMPUTER SCIENCE AND INFORMATION TECHNOLOGY

The eagerly awaited Final Year Project (FYP) presentations for the 2019 batch of the Bachelor of Science in Computer Science and Information Technology program at the Department of Information and Computing, University of Sufism and Modern Sciences, Bhitshah, were successfully conducted, marking a significant milestone for the graduating students. The event, chaired by the esteemed Vice-Chancellor, Prof. Dr. Parveen Munshi, and graced by the Registrar, Prof. Dr. Arshad Saleem, showcased the culmination of the students' academic journey. The presence of all faculty members and focal persons from the Computer Science and Information Technology department added an aura of academic excellence to the proceedings. Dr. Dhani Bux Talpur and Miss Naadiya served as examiners, evaluating the projects with their expertise. The presentations not only highlighted the technical prowess of the students but also underscored the commitment of the university to nurturing future leaders in the field of technology.

BACKGROUND AND MOTIVATION

- WordPress is a widely used content management system (CMS) for building blogs, apps, and websites.
- It is freely available, open source, and built on MySQL and PHP.
- Setup requires nothing more than a domain, MySQL, and PHP (e.g., WAMP or LAMP stack).
- WordPress' popularity is driven by diverse themes and an extensive management system.
- Developers can create personalized themes and use plugins for specific client needs.
- Major brands like Microsoft, IBM, Nike, Intel, BBC, America, and Angry Birds use WordPress.
- WordPress powers a significant portion of the web with 34.4% influence since March 2016.
- It serves as the foundation for content management systems, making it the premier tool for web-based design services globally.
